The term relative age effect (RAE), also known as birthdate effect or birth date effect, is used to describe a

bias, evident in the upper echelons of youth sport and academia, where participation is higher amongst those born early in the relevant selection period (and correspondingly lower amongst those born late in the selection period) than would be expected from the normalised distribution ...

"I am very happy that you guys released this, not only it is a great idea it was executed properly. I will use this to build a basic AMP site for a customer. i looked at the video and demo sites and was very happy with what could be done. I would really like for Mobirise team to add more widgets to your free website design software.
