Mission. Supply-Chain Management (SCM), techniques with the aim of coordinating all parts of SC from supplying raw materials to delivering and/or resumption of products, tries to minimize total costs with respect to existing conflicts among the chain partners. An example of these conflicts is the interrelation between the sale department desiring to have higher inventory levels to fulfill ...

Supply Chain Management (SCM), in recent years, has received increased attention from both academicians and managers. Managing a supply chain implies the integrated management of a network of entities, that begins with the suppliers' suppliers and ends with the customers' customers, for the production of products and services to the end consumers.
