the Atlas of Living Australia (ALA), which provides integrated, free, and open access to data and information about Costa Rican biodiversity in order to support science, education, and conservation.

The Living Atlases Community in Action: Sharing Species

taxonomy is used when referring specifically to the process of naming. Nomenclature refers to the actual names or word structure used in names. The naming system, or classification system, employed in biology involves a series of categories in a hierarchy so that each level includes several sublevels.

Introduction to Classification and Taxonomy

bipedality, brain expansion, and cultural progress, the living links approach reaches back further in time so as to include the evolution of all Hominoids. A Quick Taxonomy of the Primate Order (See University of Manitoba for an excellent and very thorough primate taxonomy) There are approximately 240 primate species.
