

technology and communication in pdf

Vehicle-to-vehicle (V2V) communication enables vehicles to wirelessly exchange information about their speed, location, and heading. The technology behind V2V communication allows vehicles to broadcast and receive omni-directional messages (up to 10 times per second), creating a 360-degree "awareness" of other vehicles in proximity.

Vehicle-to-Vehicle Communication | NHTSA

Wireless communication technology usage is rapidly increasing nowadays in applications such as wireless sensor networks, industrial automation systems, home automation systems, remote control systems, medical care equipments, automation systems for agricultural use, and other applications. Among various communication technologies, Zigbee is an emerging and very promising international standards ...
