Impasto is a technique used in painting, where paint is laid on an area of the surface in very thick layers, usually thick enough that the brush or painting-knife strokes are visible. Paint can also be mixed right on the canvas. When dry, impasto provides texture; the paint appears to be coming out of the canvas.

ABSTRACT. In this article, I argue that attempting to solve real problems is a possible approach to bring social and natural sciences together, and suggest that - as Environmental Impact Assessment necessarily

brings together social and environmental issues - this debate is a strong candidate for such a task.

You might think that everyone who has diabetes would know about a seed that is superior to other plant and marine sources of essential omega-3 oils. It is also high in antioxidants and fiber. Besides that, it is high in protein and lipids, is low in sodium, and has fewer net carbs than most other grains. But we have more misinformation about it than we have knowledge.
